

Narasimha M

Front End Developer

+1 (224)-455-0194 | narasimha202.m@gmail.com | www.linkedin.com/in/narasimha202m

PROFESSIONAL SUMMARY:

Front-End Developer with **3+ years of experience** designing and delivering responsive, high-performance web applications. Skilled in **React.js, Redux, JavaScript (ES6+), HTML5, CSS3**, and modern UI frameworks including **Tailwind CSS** and **Bootstrap**. Proven ability to improve application performance, build scalable reusable components, and integrate **RESTful APIs**. Former System Analyst (2016–2020), experienced in requirements gathering, stakeholder communication, and technical documentation strengths that support delivering solutions aligned with both user needs and business goals. Experienced in Agile environments and committed to clean, maintainable code.

TECHNICAL SKILLS:

- **Languages** - HTML5, CSS3, JavaScript (ES6+), JSX.
- **Framework & Libraries** - React.js, React Router, Bootstrap, Tailwind CSS.
- **State Management** - Redux, Context API, Zustand, Redux Toolkit.
- **Build Automation** - Babel, Webpack.
- **API Integration**- RESTful APIs, GraphQL, SOAP, Postman.
- **Web/App Servers** - Node.js, Express.js.
- **Databases** - PostgreSQL, MongoDB, MySQL.
- **Cloud Technologies** - AWS, Azure, GCP.
- **IDE tools** - VS Code, Notepad++, Sublime Text.
- **Testing Tools** - React Testing Library, Jest, Mocha, Chai, Jasmine.
- **Version Control** - Git, Bitbucket.
- **OS & Environment** - Windows, Linux.

PROFESSIONAL EXPERIENCE:

Client: Healthfirst – New York, NY
Front End Developer

Nov-2024 – Present

Responsibilities :

- Worked with UX designers to refine layouts and components, ensuring the design vision is translated into a usable, accessible interface.
- Partnered with QA, backend, and DevOps teams in Agile sprints to resolve blockers early, improving delivery speed.
- Built and maintained a **reusable UI component** library, speeding up development and keeping designs consistent across multiple features.
- Managed complex application state with **Redux**, reducing bugs and ensuring predictable data flow in a large-scale environment.
- Implemented **Role-Based Access Control (RBAC)**, ensuring users only accessed authorized features and sensitive data.
- Secured frontend routes with **JWT**-based authentication, improving session reliability and protecting user data.
- Improved application speed by identifying slow API calls and applying **lazy loading, code splitting**, cutting initial load time by 30%.

- Debugged and optimized performance issues using browser DevTools and network analysis, reducing rendering delays by 20% and improving responsiveness.
- Conducted cross-browser and accessibility testing to ensure consistent performance and compliance with accessibility standards.
- Reviewed pull requests and participated in code reviews, raising overall code quality and sharing knowledge with teammates.
- Contributed to CI/CD pipelines by testing deployments and giving feedback on build processes, enabling smoother releases.
- Deployed and tested frontend builds on **AWS S3/CloudFront**, ensuring fast, reliable delivery of web applications.
- Documented key components, best practices, supporting faster onboarding and long-term maintainability.
- Mentored junior developers on React best practices, component design, and state management, improving overall team productivity.

Environment: React.js, Redux, Context API, JavaScript (ES6+), JSX, HTML5, CSS3, Tailwind CSS, Bootstrap, React Router, React Suspense, React Lazy, Node.js, Express.js, RESTful APIs, JWT, CI/CD, AWS S3/CloudFront, Jest, Mocha, Babel, Webpack, Git, Bitbucket.

Client: Daifuku - Hyderabad, India
Front End Developer

July 2020 – Dec 2022

Responsibilities:

- Developed responsive web applications and SPAs using **React.js**, **React Router**, **JavaScript (ES6+)**, **HTML5**, and **CSS3**, improving cross-device usability and user satisfaction.
- Created a shared UI component library and reusable React components, reducing feature development time by 25%.
- Applied **Redux**, **Context API** for efficient state management, simplifying debugging in growing applications.
- Integrated **RESTful APIs** with **Axios** and **Fetch** to deliver dynamic content efficiently.
- Implemented form validations and dynamic input handling, reducing user input errors by 15%.
- Styled responsive layouts using CSS Grid, Flexbox, and media queries, ensuring cross-browser compatibility.
- Conducted unit and integration testing using **Jest** and **React Testing Library**, reducing post-QA bugs by 20%.
- Leveraged Webpack and Gulp for build automation and bundling, improving build reliability.
- Collaborated with backend teams to align API requirements and resolve integration issues.
- Deployed and optimized frontend applications on **GCP** (Google Cloud Storage and Cloud CDN), ensuring fast and scalable delivery of web apps.

Environment: HTML5, CSS3, JavaScript (ES6+), React.js, Redux, React Router, JSX, Bootstrap, Tailwind CSS, Node.js, Express.js, RESTful APIs, Axios, Fetch API, JWT, GCP, Jest, Babel, Webpack, Git.

Client: - Seymour Systems - Hyderabad, India
System Analyst

June 2016 – May 2020

Responsibilities:

- Acted as a liaison between clients and technical teams, translating business requirements into actionable user stories and process flows, ensuring project alignment with business goals.
- Collaborated with designers and developers to deliver practical solutions, reducing rework and improving development efficiency.
- Supported UAT and feature testing, providing timely feedback to resolve defects and enhance software quality.

- Prepared documentation, conducted demos, and provided post-go-live support, contributing to smoother project transitions.
- Suggested process improvements that boosted team productivity and reduced project delays

Environment: JIRA, Confluence, Visio, SQL, Postman, Git, Jenkins, Agile/Scrum.

Education:

Master's in Information Science.
Trine University.

Jan 2023 – Aug 2024
